DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-41, drawn to a method and a program product for enhancing a selected video frame in a single layer video stream, classified in class 715, subclass 500.1.
 - II. Claims 42-47, drawn to a method for manipulating a video frame in a buffer, classified in class 715, subclass 723.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are directed to related manipulating a video frame. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, invention I is directed to enhancing a selected video frame by incorporating information of other video frames in a same single layer digital video stream whereas invention II is directed to manipulating a video frame stored in a work buffer in which manipulating a portion of said video frame occurs in a processing buffer and combining other manipulated portions of the video frame occurs in a frame buffer.

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

5. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cong-Lac Huynh whose telephone number is 571-272-4125. The examiner can normally be reached on Mon-Thurs (9:00-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Hong can be reached on 571-272-4124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
